

Patients Can't *AFFORD* Medication?

THERE IS A SOLUTION.

By partnering with MedData Services, health care providers and medical facilities can more easily and quickly receive

free prescription medications

for low income and uninsured individuals. Organizations that purchase medications for indigent patients will benefit from the cost savings that can be generated by the use of our industry-leading, Internet-based Prescription Assistance Program.

NEED TO LOWER HEALTHCARE COSTS?

There is a solution. MedData Services also provides

inpatient recovery and reimbursement programs.

Using our program to recover just one or two high-end injections would more than pay for our service cost. With MedData Services, all necessary information is contained on our website; there is no redirecting to other sites to get necessary forms.

THE PROOF IS IN THE BOTTOM LINE: MedData Services has helped its clients receive more than \$1.3 billion in free prescription medication.

**SPECIAL

Patients Don't Have *INSURANCE COVERAGE* ?

*THERE IS A SOLUTION.
MEDDATA SERVICES WORKS*

with every major pharmaceutical company

to provide access or reimbursement to ALL prescription drugs for low income or uninsured patients. Through our Internet-based program, our clients have 24/7 access to the information and forms necessary to participate in the Prescription Assistance Program/Patient Assistance Program (PAP) offered by the major pharmaceutical manufacturers.

Most importantly, we make it easy. Because there is no standard procedure amongst the prescription drug manufacturers, administering the program and obtaining the most up-to-date information can be costly and time-consuming. Our Internet-based software program provides the most current, comprehensive database of drugs available; maintains required forms and information for each major pharmaceutical company; and guides you through each step of the process:

- 1. patient application*
- 2. prescription ordering*
- 3. usage tracking*
- 4. automatic renewals*
- 5. reports*
